WORLD
TOTALe® PRO

An online community of language learners.

Rosetta World® is an interactive, online community where learners practise and connect with other TOTALe learners from around the globe.* Language learned in Rosetta Course® is reinforced through interactive activities that help learners stay motivated to reach their language-learning goals.

## Natural ability, engaged.

Learners start with activities that challenge them to use what they have learned in Rosetta Course. As they progress, they will have the opportunity to practise with more advanced content. All activities are designed to sharpen language skills. Learners are even able to chat with one another in some activities, fostering real-world conversation that helps to build confidence.

Rosetta World activities reinforce Rosetta Course lessons.

The language reinforced in Rosetta World progresses with learners as they advance in Rosetta Course. This ensures a dynamic experience that keeps learners challenged and motivated to achieve conversational proficiency in the new language.

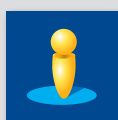

Reinforcement through interactive activities engages learners, helping them to increase their retention of the new language.

Culturally relevant stories keep learners engaged while expanding on language learned in Rosetta Course.

Rosetta Stone®

A variety of activities keep learners motivated.

Developed with cutting-edge technologies, our online environment encourages interaction and facilitates language learning. Three different types of activities reinforce reading, writing, speaking, and listening skills.
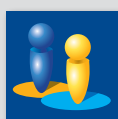

|		
	SOLO activities	In Solo activities, learners practise by themselves to reinforce lessons in an entertaining way.
	DUO activities*	In Duo activities, learners click, type, or speak with other learners in competitive or cooperative language-learning activities. Learners stay motivated while helping each other practise and retain their new language.
	SIMBIO® activities*	Simbio activities provide a chance for learners to engage in a language exchange with a partner – each in the process of learning the other's native language. Learners in Simbio alternate between one activity in one learner's new language and another activity in the partner's new language.

Sample activities.

There is always something new to discover and all activities are designed to help learners reinforce and ultimately speak their new language. Here are a few examples:

MemGo™ (Solo, Duo, Simbio)
Try to remember and match pictures to text by clicking on "cards" randomly arranged in a grid.

BuzzBingo™ (Solo, Duo)
Listen to a recording of a native speaker and click on each word you recognise.

Senti™
Describe an image with text. Utilise a native speaker for help. Practise sentence creation.
