

# Customised language training relevant to your organisation.

Companies often face unique language barriers that directly impact their bottom line in areas such as customer service interactions, critical safety operations, regulatory compliance, and cross-cultural collaboration.

Rosetta Stone® Custom Solutions for Business is a service that provides custom content and instructional options to equip learners with language learning customised specifically to your business needs.

As your partner, our team of expert curriculum designers can build your custom language programme to achieve specific learning outcomes— from vocabulary unique to your company culture and mission to deep industry language, tailored to your requirements. Rosetta Stone Custom Solutions offers instructor-led online classes for your employees based on the curriculum we develop for you.

## KEY FEATURES\*

**Content Authoring** services tailor content to specific context and desired learning requirements.

**Customised Live Tutoring** delivers virtual language classroom sessions to your employees.

**Administrator Tools** allow managers to track and measure learner progress.

**Training, Implementation, and Support** services provide successful deployment in your organisation.

## KEY BENEFITS

Rosetta Stone® Custom Solutions for Business aligns language training with your needs.

- Removes language barriers and builds language skills that address critical business needs
- Drives employee motivation by offering training relevant to their day-to-day work
- Improves communications, making employees more effective

## ROSETTA STONE® LANGUAGE LEARNING SUITE FOR BUSINESS

Rosetta Stone Custom Solutions for Business combines e-Learning and proven methodologies to develop customised language programmes for a company.

# Tailor language programmes to meet your unique needs.

## **Content Authoring customises language training.**

Our team of expert curriculum designers builds your custom language solutions, providing a proven instructional framework that helps achieve learning outcomes. Superior speech-recognition technology can be embedded throughout the programme.

Our curriculum designers will work with you to analyse your organisation's language-learning objectives and establish learning outcomes, define and design requirements, develop lesson content, and implement your custom language-training programme. Once the solution is in place, our team will work with you to evaluate outcomes and ensure success.

## **Customised Live Tutoring boosts learner participation.**

Instructor-led online classes deliver virtual live instruction to your learners. The curriculum is designed to your specific requirements and learner outcomes. The online sessions are restricted to your organisation only, on a prearranged regular schedule for up to 10 employees per one-hour class.

Classes can be focused on conversational practice in specific settings or include specific vocabulary and grammar instruction. Learners will be able to interact and converse with a qualified tutor, who is always a native speaker, as well as other learners, building confidence as they speak their new language.

## **Administrator Tools provide dynamic reporting options.**

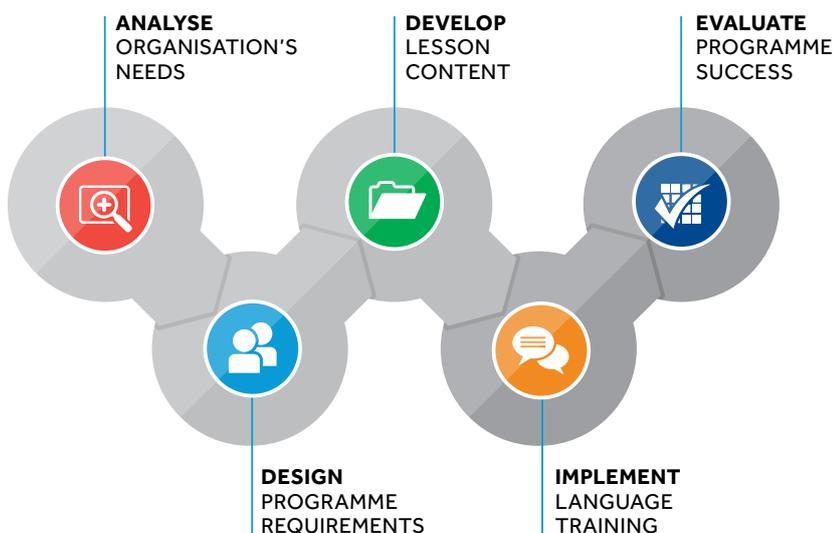

Administrator Tools enable managers to give programme managers real-time reports on usage and learner progress as well as manage learner lists and groups.

## **Training, Implementation, and Support services prepare you for success.**

Our team of experts partners with you to plan, deploy, and promote the programme in your organisation, and integrate our solutions into your technical infrastructure.

*\*All features are not available in all countries and markets. Contact your sales representative for specific offerings.*

Our specialists will consult closely with you to define content and instructional options tailored to your specific needs and assist with programme implementation.
