Build towards conversational proficiency.

Rosetta Stone® Foundations for Higher Education is a scalable e-Learning solution designed for beginner to intermediate learners in up to 24 languages to build fundamental language skills.

Our structured approach engages learners by developing language skills through a predefined sequence and method using sounds, images, and text to help learners absorb meaning intuitively, so learning is natural.

As learners complete interactive language instruction they unlock the ability to practise their language skills through games, activities, stories, and live online conversations—adjusted to their learning progress.

KEY FEATURES*

Language Lessons provide core language instruction.

Live Tutoring enables online conversation with native speakers.

Games and Activities reinforce language skills in fun, engaging ways.

Administrator Tools provide educators with reporting tools to track and measure learner progress.

Mobile Apps enable anytime, anywhere learning.

Training, Implementation, and Support services ensure successful deployment at your campus or institution.

ROSETTA STONE® LANGUAGE LEARNING SUITE FOR HIGHER EDUCATION

Rosetta Stone Foundations for Higher Education combines e-Learning and proven methodologies for easy integration into an institution's language programme.

KEY BENEFITS

Rosetta Stone® Foundations for Higher Education is a comprehensive language solution.

- Immersion environment activates natural aptitude for acquiring a new language

- Personalised experience enables learners to progress at their own pace through a structured sequence

- Accessibility anytime, anywhere on computers and mobile devices such as tablets and smartphones

- Gamification makes language learning fun and interesting while delivering results

Language Lessons engage students instantly.

Learning begins immediately in an immersion environment with interactive activities carefully sequenced to build language naturally. Core lessons introduce reading, writing, speaking, and listening skills, then key skills such as grammar and vocabulary are refined in focused activities.

Strong emphasis is placed on producing spoken language. Proprietary speech recognition evaluates learners' pronunciation, providing immediate feedback guiding learners to speak the new language correctly.

Live Tutoring enables learners to converse online.

Tutors who are native speakers converse with learners directly online and facilitate live, interactive conversations that include up to three other learners at the same level.

Games and Activities stimulate and engage.

Content learnt in Language Lessons is reinforced with interactive games and activities that provide fun ways to apply and reinforce the new language. Learners practise reading culturally relevant stories aloud, receiving feedback on their pronunciation via speech-recognition technology.

Administrator Tools provide dynamic reporting options.

Management tools enable monitoring of learner, class, and group progress. Reports identify learners' strengths and weaknesses, assisting educators for planning group and one-on-one instruction. Administrators can manage access, roles, and permissions across a campus programme.

Mobile Apps enable learning anytime, anywhere.

Learners practise and increase retention of language skills and vocabulary at their convenience using a variety of mobile devices.

Training, Implementation, and Support services focus on your goals.

Our team of experts partners with you to effectively implement a programme that can blend with in-class instruction. We support your lecturers and staff by ensuring our solutions work within your technical infrastructure.

All features are not available in all countries and markets. Please contact your sales representative for specific offerings.
