

Course Description

Rosetta Stone Catalyst - Hebrew - Beginner

You will learn exclusively in Hebrew, without translation, quickly gaining the confidence to communicate. The Rosetta Stone immersion-based learning method immediately teaches you to think in a new language by connecting words with vivid imagery in real-life contexts to convey meaning. Each unit contains four core lessons, which teach new material, and a final Milestone review lesson. Complementing the core lessons are smaller focused lessons that reinforce specific concepts and vocabulary for that unit.

All lessons and activities are available both on web and on our mobile apps for iOS and Android, making learning possible anytime, anywhere—even offline. In addition, learners who have access to live tutoring can sharpen conversational skills with one of our native-speaking tutors in small group sessions with other learners at the same level or in a private session.
