

There's a new version of Rosetta Stone Catalyst

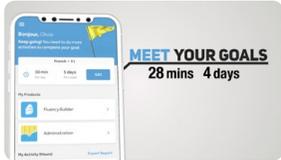

The latest version of Rosetta Stone® Catalyst® is here. This is the most extensive update since Catalyst was introduced and offers a great new look and feel, award winning apps, goal-driven content, improved speed and overall performance, and much more.

Speak confidently at work, at home or on the go.

Catalyst helps you build fluency in the language you are learning so that you can use it confidently in the real world. You learn faster with our blend of our award-winning eLearning activities and support from native-speaking Tutors in unlimited sessions and graded exercises*. The new upgrade gives you the ability to study when you are most engaged—whether at home, on a commute, in the break room . . . **anywhere.**

Now it's even easier to learn anywhere.

My Goals helps you focus on proficiency, goals, and desired pace right from the start.

Goal setting helps you set your sights on your desired outcomes and celebrate as you pass important milestones.

Business and Conversational Content deliver a premium learning experience.

Thousands of hours of rich audio and video content give you access to valuable resources covering culture, history, geography, business, industry, and more.

End-to-End mobile solution lets you set your own pace.

You can log in to lessons and activities from the office or with the mobile app during your commute. Online and mobile apps are in sync, so your progress is always saved.

Offline Mode enables you to select and download lessons to use offline.

Now you can study whenever and wherever you want, without the internet. When you reconnect, your lesson activity will sync on mobile and web apps.

Exclusive speech recognition engine helps you perfect your pronunciation.

Instant visual and auditory feedback increases the quality of your speaking practice—great preparation for talking with co-workers, presenting to customers, and engaging in the community.

Unlimited Live Tutoring keeps the conversation real.

You can sharpen your conversational skills in personalized one-on-one sessions aligned to your goals or in small group sessions with other learners at the same lesson level. All tutors are native speakers.

Seek and Speak lets you use your iPhone camera for interactive learning.

Taking real-world photos of objects that automatically become flash cards personalizes learning for vocabulary and chat-based practice. Look for challenges that increase learner engagement*.

How do I get started on the app?

Getting started is easy. For Beginner Learners (Beginner to A2),**

1. Download the Learn Languages app (if you're an existing learner you will be prompted to update the app).
2. Login to the app to see the improved navigation, modern design, and enhanced performance. If you're an existing learner you will pick up where you left off.

For Intermediate and Advanced Learners* (B1-C1+),**

1. Download the Fluency Builder app.
2. Login to the app – if you are an existing learner, you will be placed back into your level and you will be asked to set goals for your learning.
3. The courses have been streamlined and re-sequenced for an even better experience. If you are an existing learner you may not see the courses you have completed, but you still have the same progress. Simply choose a course that interests you and continue learning.

* Seek and Speak is only available to Beginner learners on the Foundations pathway

** in the Foundations pathway

*** previously in the Advanced English for Business or Advantage pathway and now in Fluency Builder
