

Rosetta Stone Dynamic Immersion

Rosetta Stone Dynamic Immersion gets employees talking

When using the Rosetta Stone® program, every word your employees hear, speak, and read is in their new language. That's the Dynamic Immersion® method, the most natural way to learn a language. Each lesson prepares learners for the next and allows employees to develop new language skills with confidence.

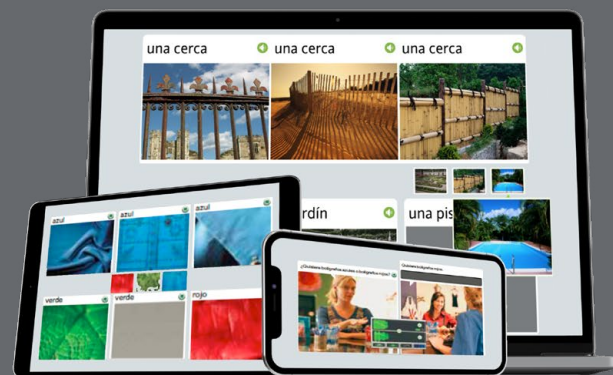

Diving into language lessons. Complete immersion in our online environment puts native language learning skills to work. Regular reinforcement of new words and phrases in new contexts helps make sure the language sticks with employees in the real world.

Images are more than pretty pictures. A colorful catalog of clear, real-life images help employees learn the meaning of a new language.

Second nature kicks in. Employees advance using language learned and clues from new images. It's their intuition at work.

Learners set their own pace. Continuous interactivity within the program confirms learner intuition.

A lesson plan that works. From beginning to end, learners work toward their language learning goals.
