

Using Rosetta Stone with Schoology

1

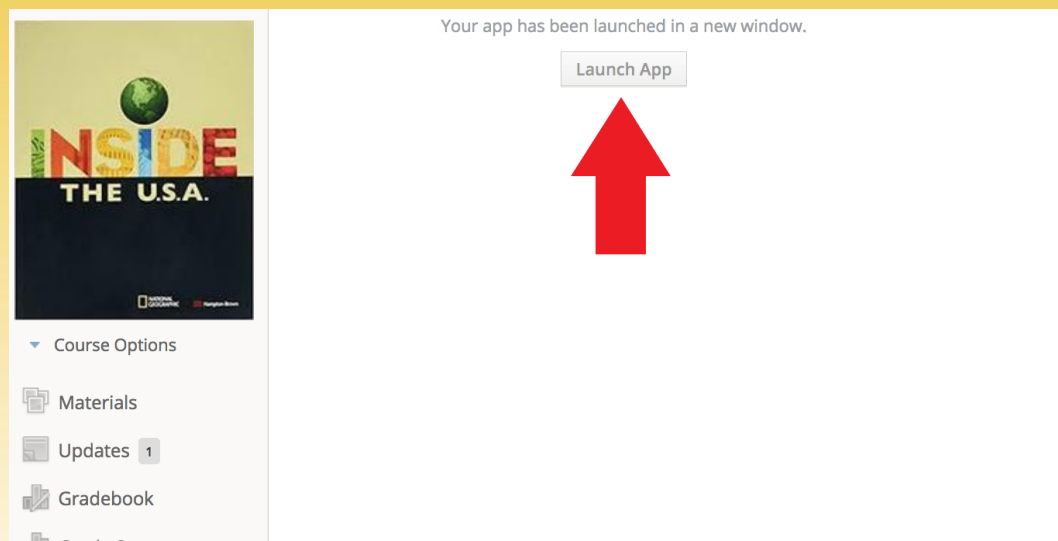

To install the Rosetta Stone application in Schoology:

1. Look for the apps waffle icon in the top navigation bar, then click **LMS App Center**.
2. Next to **Publisher Name**, type in **Rosetta Stone** then click **Submit**.
3. Once you see the entries for Rosetta Stone, choose the application appropriate for your students, then click the **Install LTI App** button near the top of the page. (DLE classes will need to install both apps.)
4. Select the courses that you want your students to have access to on Rosetta Stone.

2

To sign in after installing Rosetta Stone, click the Rosetta Stone app in your left navigation.

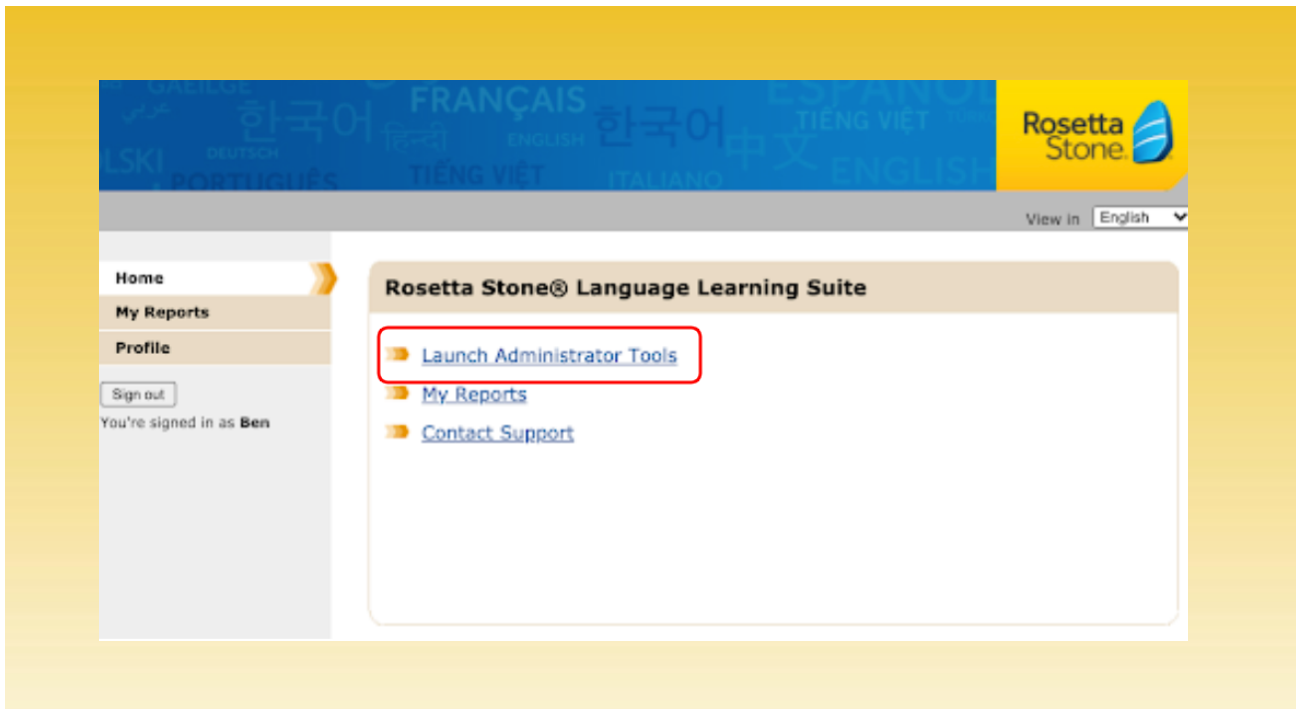

You don't need a separate username and password.
Just click **Sign in to Rosetta Stone!** within Schoology.

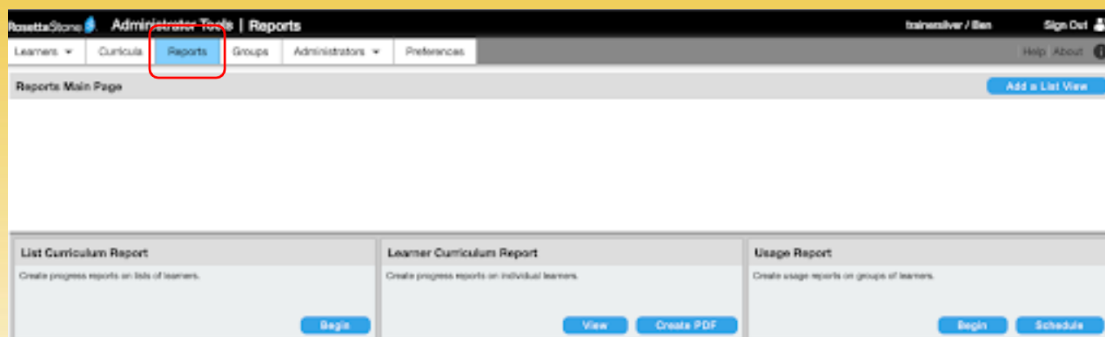

Rosetta Stone Foundations is best viewed in a new tab. Schoology is set up so that when you click **Launch App** it will open Rosetta Stone in a new tab.

3

Teachers will select "Launch Administrator Tools" to manage Learner Lists and access reports.

Select **Reports** to monitor students' usage and progress.

4

Students will select "Launch Rosetta Stone Foundations" to begin working.
